BICYCLE AUTOPSY

WELDING BASICS

FRAME CHOPPING

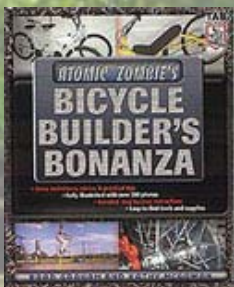

Leo's handmade bikes

"This is my attempt at a trike. It's 7 feet 4 inches long, just fits in a long bed truck. Future plans are for more trikes, but shorter wheelbase. Thanks for the inspiration to break out the sawzall and welder. Keep up

the good work.

"Thanks for the great plans and advice. Love seeing what other people are building. This bike is 8 feet 6 inches long. Also sending pic of bike sculpture, not rideable, but someone may figure how to make it rideable. Many thanks. Leo"

ATOMIC ZOMBIE KREW FEEDBACK

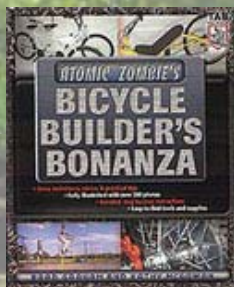

BICYCLE AUTOPSY

WELDING BASICS

FRAME CHOPPING

"Hi RadicalBrad. Years ago, I saw a 4-wheel bike that I thought was the coolest thing, so I decided to build something like it. It was called the "Animas Quadracycle". It has full independent suspension, lots of ground clearance. It's like a human powered Jeep.

I got as far as the frame, wheels and transmission but the test rides did not go as planned. So, I set it aside and let it rust. Then, I found your site and bought some plans, 26 in all so far. I haven't made any bikes yet because we just moved into a new house with a big yard and I have a lot to do.

But someday I will be building and with your plans I know things will go so much smoother than before. The other day I was looking at your new channel on YouTube and then I thought I'd look for the Animas Quadracycle and I found it. I really think you should give it a look. I just know that if you do you'll know what to build one like it and then I can buy those plans from you and build my own. Take a look at it, you won't be disappointed.

I think your new place in the mountains is great. I really love your work. Have a great day, Kevin Gallagher, Engineering Technician/Project Manager."

Fred's SWB 'Bent

"Hello, Fred from Conley, Georgia again.

This was a 80s model girls 3 speed. It's pretty much my daily ride for now. I like the internal shifting I'd like to run across a 7 speed on a scrapper (good luck, right).

I'm working on a Kyoto right now. It's my first cus-

tom that has multiple chain rings. It's going quite well so far. I'll send y'all a pic when I finish. Thanks for what you guys do. Fred."

David's cool crazy trike - Australia

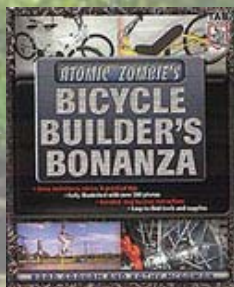

BICYCLE AUTOPSY

WELDING BASICS

FRAME CHOPPING

"What do you think of this crazy trike? It started off as a standard Gomier Trike Then Mike at Little River Garage - Evans Head Help to create my trike. It isn't quite finished yet, though.
