Tripletto

"Hi Atomic Zombie.

Would you be so kind as to add my recent creation to your builders gallery in the TANDEM section.

She is a 3 seater triplet I have called 'Tripletto'.

Many thanks. Dave Voller, UK

P.S. Great site. I love getting your newsletters. Thanks. Dave."

"Here's my vintage Huffy with bobble head rider- dowels, hinges, Snapple cap spine, plastic bucket and bottles.

He really does pedal. But when it comes right down to it, he's just dead weight. Nyuk, nyuk, nyuk!

Scott Anderson

"Attached is a picture of my recently completed tall bike for your consideration in adding to the gallery. Thanks. Dan"

Zombie feedback

"Greetings to you from Alabama. Your site is the most interesting site I have ever seen on the internet. The info and how you deliver it is first class. I recently purchased six plans from you and going to start building me a tadpole. I read through all the plans and thought a tutorial on wheels, hubs, spokes and lacing would be interesting. I love your Atomic Zombie site and look forward to more of it. God bless you and yours and have a great day. Eddie"

First attempt at building my own trike. Ray, Cycle Tectonics, www.quik-pak.com

Zombie feedback

"Hi Brad and Kathy. I just wanted to let you know that I'm using text from your website as part of a project to my publishing design class. I'm making a book jacket and 2-page spread for a pretend book about building tall bikes. I am going to credit you as the authors and put your website on it. I'll send you the pdfs (if I get a good mark)." ~ Lisa

WORKING IN THE FIELD

Zombie feedback

"Brad. Thanks for your reply. Just to let you know the aftermath, I have just spent the morning calling around to another bunch of suppliers and/or fabricators. I have finally found one fabricator who will special order in a couple of 20 foot lengths of 1 1/2 square .065 tubing - at a price of \$2.68/foot.

Only one other person said he could maybe order it - everyone else said it was not available! And, when I suggested that it was easy to find in Ontario, I received impolite comments about people in your fine province. :o)

So, all is good. I am anxious to get started. As I look at the growing piles of old bikes and parts and frames and tools that I have gathered up in the past month or so, I have little choice! They all have to be put to use or else I will be asked to vacate.

I do want to add again my admiration for what you and Kathy have been doing. Last week, I ordered the Bike Builders Bonanza so have been enjoying reading about your past designs and experiments. I will take the book with me when we return to Ghana in January so I can share it with my son and the guys involved in my son's bike project over there. Akwasi is already stoked to see what comes out of my workshop this winter and I keep thinking about how we can get some Atomic Zombie creations built in Ghana as well.

Best wishes, Rod"

"This bike model is called a Fosscati FG4 Tincogan Thumper. It is a Felt Heritage frame.

WORKING IN THE FIELD

"Hello there zombies!

My name is Veno, and I am huge bike fan!

I live in baroque city of Varaždin, Croatia, which is also a bicycle city of Croatia.

This is my idea of a tandem bike! I call it VTB Tandem Bike! I always wanted to have one of those, so I built it myself!

I recently bought yours DIY plans of Viking Trike and I will try to build it.

Best regards from Croatia. Veno Martić

Pivot tube problems - help

"Hello. yeah, it's me again. I seem to having problems all over the place. LOL! Help!

I was preparing the rear frame of a suspension bike for the Cyclebully and tried to unscrew the pivot tube with a hex driver, but the screw got threaded instead."

Zombie feedback

"Your website is a gold mine for what I'm considering. Thanks.

Have you ever seen the Coker Wheelman? I want to build one for my son for Christmas. Trying to find a 36" wheel with a unicycle crank is a tough find. Any suggestions? Thanks a lot. Mark"
